

CONSENT TO AUDIO RECORDING & TRANSCRIPTION

Evaluating the needs of foreigners in Bogota/Uniandes in order to build an app that helps integration

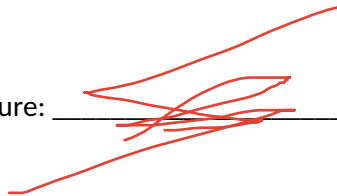

Gwenaëlle Ancel – Uniandes Student – App. Development Class

This study involves the recording of your interview with the researcher. Your name and other identifying information (voice, age, home country ...) will be associated with the audio or audio recording or the transcript. Only the research team, the professor of the class and the other students will be able to listen to the recordings.

The tapes will be transcribed by the researcher and erased once the transcriptions are checked for accuracy and the professor validated and graded them. Transcripts of your interview will only be used by the team and the teacher to identify your needs; the transcripts may appear in official written documents or presentations of the final application, but those documents would only be accessible to the class students and professor. Your name and other identifying information (voice, age, home country) might appear in those documents.

By signing this form, I am allowing the researcher to audio tape me as part of this research. I also understand that this consent for recording is effective until the following date: 31/12/2023. On or before that date, the tapes will be destroyed. The transcripts will be conserved as part of the project.

Participant's Signature: _____ Date: _____

A handwritten signature in red ink, consisting of several overlapping loops and strokes, positioned over the signature line.
